Project Design Phase-II Technology Stack (Architecture & Stack)

| Date | 15 October 2022 |
|---------------|--|
| Team ID | PNT2022TMID51228 |
| Project Name | Project - Real - Time Communication System PoweredBy AI for Specially Abled |
| Maximum Marks | 4 Marks |

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

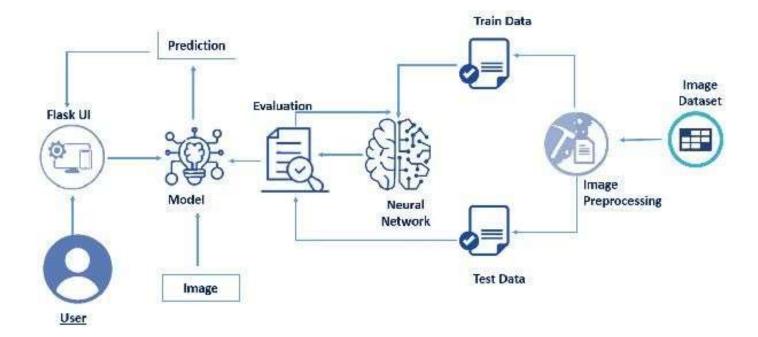

Table-1 : Components & Technologies:

| S.No | Component | Description | Technology |
|------|---------------------------------|--|---|
| 1. | User Interface | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc. | HTML, CSS, JavaScript / Angular Js / React Js etc. |
| 2. | Application Logic-1 | It deals with variety of frameworks, libraries and supports required to develop the project | Java / Python |
| 3. | Application Logic-2 | Helps in converting human voice into written words, In simple it is used to convert speech to text. | IBM Watson STT service |
| 4. | Application Logic-3 | Provides fast ,consistent and accurate answers during the execution phase of the project | IBM Watson Assistant |
| 5. | Database | It can be numerical, categorical or time-series data | MySQL, NoSQL, etc. |
| 6. | Cloud Database | Enables the user to use host database without buying the additional hardware | IBM DB2, IBM Cloudant etc. |
| 7. | File Storage | File storage should be highly flexible, scalable and effective | IBM Block Storage or Other Storage Service or Local Filesystem |
| 8. | External API-1 | Used to access the information in the cloud | IBM Weather API, etc. |
| 9. | External API-2 | Used to access the information for data driven decision making | Aadhar API, etc. |
| 10. | Machine Learning Model | Machine Learning Model deals with various algorithms that are needed for the implementation | Real time communication using Al for specially abled |
| 11. | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud Local Server Configuration: Install the windows version and execute the installer Select APACHE to install web server Cloud Server Configuration: This server deals with the additional storage | Local, Cloud Foundry, Kubernetes, etc. |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|--------------------------|---|---|
| 1. | Open-Source Frameworks | The frameworks used are | Tensor flow PyTorch, OpenCV |
| 2. | Security Implementations | the security / access controls implemented, use of firewalls etc. | Identify, Prevent aznd Respond |
| 3. | Scalable Architecture | the scalability of architecture (3 – tier, Microservices) | Data , models, operate at size, speed and complexity |
| 4. | Availability | the availability of application (e.g. use of load balancers, distributed servers etc.) | Image and facial recognition, lip reading, text summarization, real time captioning |
| 5. | Performance | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | Full and effective participation , equality of opportunity, accessibility |
